

30x173MM AMMUNITION SUITE FOR MK44 CANNON

MK239 TP-T - MK264 MPLD-T - PGU-13D/B - PGU-15A/B

General Dynamics Ordnance and Tactical Systems has been producing 30mm ammunition for over 40 years. Our experience in design, development and manufacturing of these cartridges establishes General Dynamics as a globally recognized supplier of high quality ammunition.

Cartridges

The MK264 provides for light armor piercing capability with a delayed explosive reaction using a chemical fuze. It is available with and without SD.

The MK239 is a low cost training ammunition, ballistically matched with the MK264.

The PGU-13D/B uses the M505 fuze, providing a high explosive round that has been used by the US Air Force extensively.

The PGU-15A/B is a low cost training round ballistically matched with the PGU-13D/B.

Pallets/Container	13 pallets/container*	13 pallets/container*	13 pallets/container*	13 pallets/container*
Manufacturing Year	New Production	New Production	New Production	New Production

The 30mm Mk264 MP-T/SD provides several advantages over the 30mm x 173 Mk266 HEI-T, including armor penetration, lower drag, better terminal performance, and an increase in accuracy of approximately 50%. The Mk264 is much more versatile when firing against structures, such as vehicles, boats, etc. Finally, its self-destruct fuze adds a level of safety not provided with the 30mm x 173 Mk266 HEI-T.

*Limited by the maximum weight allowable for the container ~38,000lbs. Each pallet weights ~4,002 lbs
