

DEMILITARIZATION

Providing Full-Service Program Management

As one of the leading integrated life cycle managers of conventional armament products and services in the world today, we have the ability to focus our systems management capabilities on the safe and efficient demilitarization of a wide variety of surplus munition items.

Our demilitarization program management capabilities represent a comprehensive base of technology and experience in munitions life cycle management.

We have extensive systems management capabilities in the development and use of new technologies to safely and efficiently recycle these surplus munitions into valuable commercial materials. These technologies include dismantling munitions, metals, and plastics recovery and re-sale, and recycling explosive materials for commercial reuse.

DEMILITARIZATION

Providing Full-Service Program Management

As a highly experienced demilitarization team. We have includes experts in program management, engineering, environmental, health, safety and security, quality assurance, contracting, and systems management and integration.

Bulk Propellants - Recovery and resale of propellants for commercial blasting use

Separate Loading Propelling Charges - Recovery and resale of propellants for commercial blasting use, and resale of recovered metals and packaging materials

High-Explosive Improved Conventional Munitions - Recovery and resale of recovered metals, plastics and packaging materials

High-Explosive D Loaded Munitions - Recovery and resale of recovered metals and packaging materials

Pyrotechnics - Recovery and reuse of magnesium and resale of recovered metals and packaging materials

Fuzes - Recovery and resale of recovered metals and packaging materials

High-Explosive Filled Bombs - Recovery and resale of explosive fillers for commercial blasting use, and resale of recovered metals and packaging materials

High-Explosive Filled Cartridges and Projectiles -

Recovery and resale of explosive fillers for commercial blasting use, and resale of recovered metals and packaging materials

All of our program management efforts are directed to the safest and most efficient demilitarization of the munitions. Our goal is to maximize the recovery, and resale of these munitions into commercially valuable materials.

General Dynamics Ordnance and Tactical Systems has managed the safe and successful demilitarization and recycling of more than 310,000 tons of surplus munition items.
