Requirements

The supplier shall furnish, with each unit or lot, a legible and reproducible copy of the “as-built” parts list, including GD-OTS furnished parts and/or raw materials, identifying all part numbers, configuration, serial numbers (where required), lot control numbers, and quantities.

Unless otherwise specified, this requirement applies to components in assemblies, or materials in components, that are specified on the applicable GD-OTS drawing.

This requirement is separate from providing certifications for components or materials.
