

Q602 Industry Standard Revisions (Rev 09/04/18)

Revisions or replacements to Government/Industry Standards referenced in the Technical Data Package (TDP) or referenced within these Standards, including those for raw materials, shall be considered process changes. (Examples of Government Standards are documents controlled by the Government and typically begin with MIL-STD, MIL-DTL, MIL-PRF, etc. Industry Standards are those controlled by organizations such as ASTM, ANSI, SAE, etc.) Should there be a need to move to a new revision after completion of the Baseline Qualification, Seller shall request and must receive written GD-OTS approval prior to implementing any revision or replacement to a referenced Government/Industry Standard in order to determine the revised standard's impact on product. Seller's request for such a change shall be formally submitted to the GD-OTS Subcontract Manager using the GD-OTS Process Change Request Form (PCR), QS-FM-10.6.1. The PCR template is available on the GD-OTS SharePoint collaboration site.

The revision of record shall be the revision documented in the Qualified Baseline and will be the revision current as of 9/15/2014. Later revisions can be incorporated provided they are included in the execution of the Baseline Qualification First Article Test.

Seller shall flow the substance of this clause to its subcontractors for items purchased in support of this Purchase Order, including this paragraph, changing the relationship of the parties and processes as appropriate to preserve the intent of the words. This clause need not be flowed to suppliers of Commercial Off-The-Shelf (COTS) items.
