Q40–Acceptance Test Inspection Reports

Requirements

Quality inspection/test data submittal required. Each shipment must be accompanied by supplier data relative to operational/functional parametric measurements/tests from the suppliers' standard quality procedures. Where specific data is required per the part drawing/specification the data must be certified by the supplier's quality assurance personnel. When source inspection is imposed, data shall be reviewed by the source inspector. Supplier shall maintain data on file for established record retention period.
