|      |       |              |                 |

#### Requirements

The Seller shall maintain a calibration system using the guidelines of ISO-10012. The Seller shall provide a certified calibration report identifying NIST traceable standards used and showing actual values measured where appropriate, for tools, devices, and equipment used to determine the acceptance of items under the Purchase Order.
