LARGE CALIBER

NEW TACTICAL CAPABILITY

The 120mm IM HE-T™ Insensitive Munition High Explosive - Tracer cartridge provides the armor forces with an improved infantry support capability.

The IM HE-T™ will complement the tanks current main gun ammunition with an Insensitive full bore HE warhead capable of defeating a target set that includes bunkers, fortifications, light armor and

The two-mode hand-settable fuze allows the tank commander to select a point detonating (PD) function for maximum fragmentation/blast, or a delay function for detonation after target penetration.

The IM HE-T™ possesses a devastatingly powerful HE warhead for the modern battlefield.

- » Insensitive warhead and propellant
- » Excellent accuracy and increased lethality out to extended line of sight
- » Over twice the HE compared to current in-service HEAT

120MM IM HE-T™

Insensitive Munition High Explosive - Tracer

CHARACTERISTICS

Cartridge weight	25kg
Projectile weight	16kg
Cartridge length	943mm
Fuze	Point Detonating and Delay*
Tracer burning distance	> 4,000m
Muzzle velocity	> 1,000m/s
Target accuracy(S.D.)	≤ 0.40mils
Explosive Charge	.2kg IM Explosive

*Fuze fulfills requirements in accordance with MIL-STD 1316 and STANAG 4187

TRAINING PRACTICE ROUNDS AVAILABLE

- » Insert charge with tracer
- » Spotting charge with tracer
