

25MM MK2 MPT-SD

Multipurpose
Tracer-Self
Destruct

MUNITIONS

MEDIUM CALIBER

OVERVIEW

The MK2 MPT-SD was developed for air-defense and surface/shipboard roles, providing for optimum terminal effects on all classes of aircraft, helicopters, surface vessels and light armored vehicles.

- » The General Dynamics Ordnance and Tactical Systems and NAMMO team have qualified, co-produced and delivered the MK2 MPT-SD for armed forces around the world.
- » Compatible with 25mm x 137 gun systems
- » Ballistic match to standard 25mm Bushmaster ammunition including M792 HEIT-SD and M793 TP-T
- » Incorporates bright visible tracer with self-destruct feature
- » Cost effective against material type targets

25MM MK2 MPT-SD

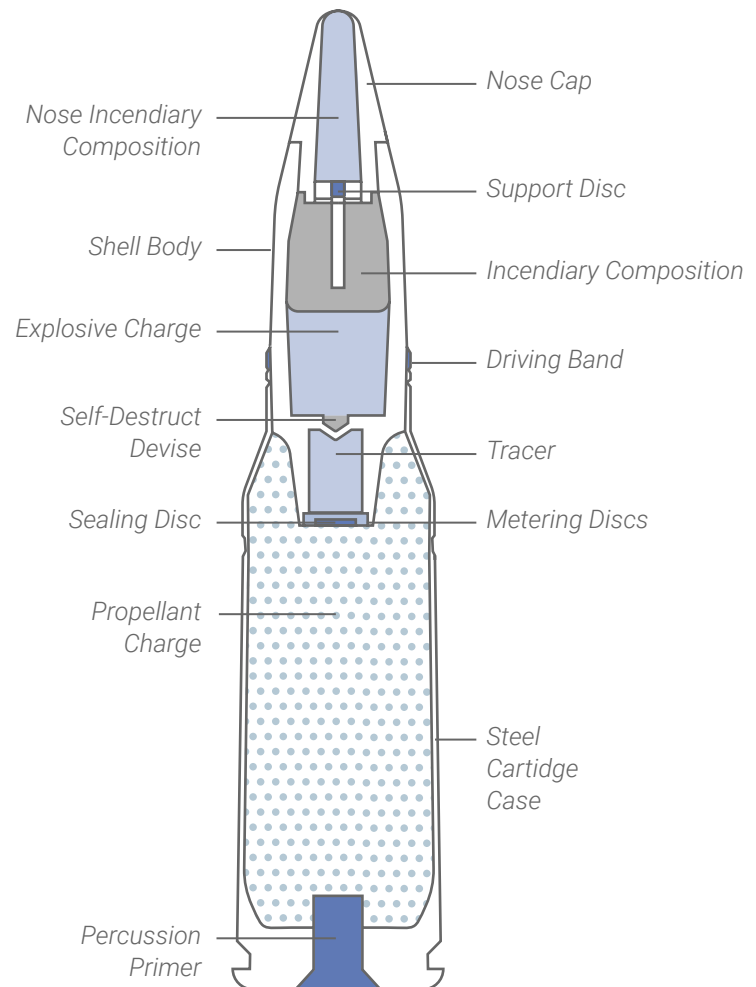

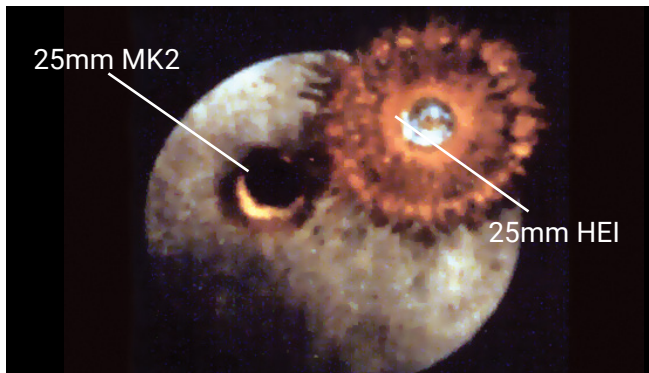

Multipurpose Tracer-Self Destruct

FEATURES

- » Delayed action – produces large fragments which result in maximum effect inside the target
- » Armor penetration, blast, fragmentation and incendiary effects behind the plate
- » Fully interoperable in 25mm x 137 gun systems to include the M242, GAU-12/U, KBA and ADEN 25

The MK2 uses the demonstrated multipurpose technology to optimize on-target effects and provide substantial terminal ballistics improvements over standard HEI ammunition.

Light armor penetration characteristics of this ammunition are far superior to standard HEI ammunition.

CHARACTERISTICS

Cartridge Weight	500 grams
Projectile Weight	183 grams
Cartridge Length	219.2mm max
Cartridge Case	Steel
Ignition	Mechanical primer with booster
Muzzle Velocity	1100m/s
Tracer / Self-destruct	>3000m
