

1.0 Requirements

The Seller shall integrate within their internal procedures specific practices to prevent the occurrence of foreign object damage or debris (FOD). The Seller is encouraged to utilize any applicable techniques found within NAS 412 as a guideline. The program shall be proportional to the sensitivity of the design of the products to FOD as well as to the FOD-generating potential of the manufacturing methods. The supplier shall document and investigate, determine root cause, and eliminate repetitive nonconformances related to FOD incidents. The written procedures developed by the supplier shall be subject to review and auditing by GD-OTS and disapproval when the supplier's procedures or policies do not accomplish their objectives.
