

1.0 Requirements

Any device with an internal or external finish containing greater than 97% pure tin (Sn) requires approval by GD-OTS Buyer and Supplier Quality Engineer. The use of pure tin, silver, selenium, zinc, cadmium, zinc and cadmium plating, or mercury is also prohibited in the construction of devices delivered on this order unless otherwise specified. The supplier shall inform the GD-OTS Buyer of any devices which are not compliant to this requirement. GD-OTS Customer will perform an X-Ray Fluoroscopy (XRF) inspection on a random sample from this lot. The sample part(s) will be inspected for the presence of prohibited materials. Acceptance of the lot by GD-OTS Customer is contingent upon the sample(s) passing the XRF inspection.
