

SMARtER 155

Cannon-Delivered
Area Effects
Munition

MUNITIONS

ARTILLERY

The SMARtER155 projectile is designed to meet the U.S. Government's Cannon-Delivered Area Effects Munition (C-DAEM) requirements by providing ground forces with the capability to engage and destroy armored combat vehicles in a GPS denied environment from both the 39 caliber and 58 caliber weapons systems.

SMARtER155's dual-submunition load-out, extended range and increased lethality delivers overmatch against adversaries and provides the warfighter with an advantage on the modern, high-intensity battlefield.
