

120MM M1028

Canister
Cartridge

MUNITIONS

LARGE CALIBER

OVERVIEW

The 120mm M1028 Canister Cartridge was developed for close-in defense of tanks against massed assaulting infantry attack. The M1028 Canister Cartridge was designed to break up infantry concentrations, between a range of 200-500 meters, by discharging large numbers of tungsten balls from the main cannon.

- » Anti-personnel capability for the Abrams tank
- » Discharges massive blast of fragments at muzzle exit
- » Devastating lethality against assaulting infantry and RPG ambushes

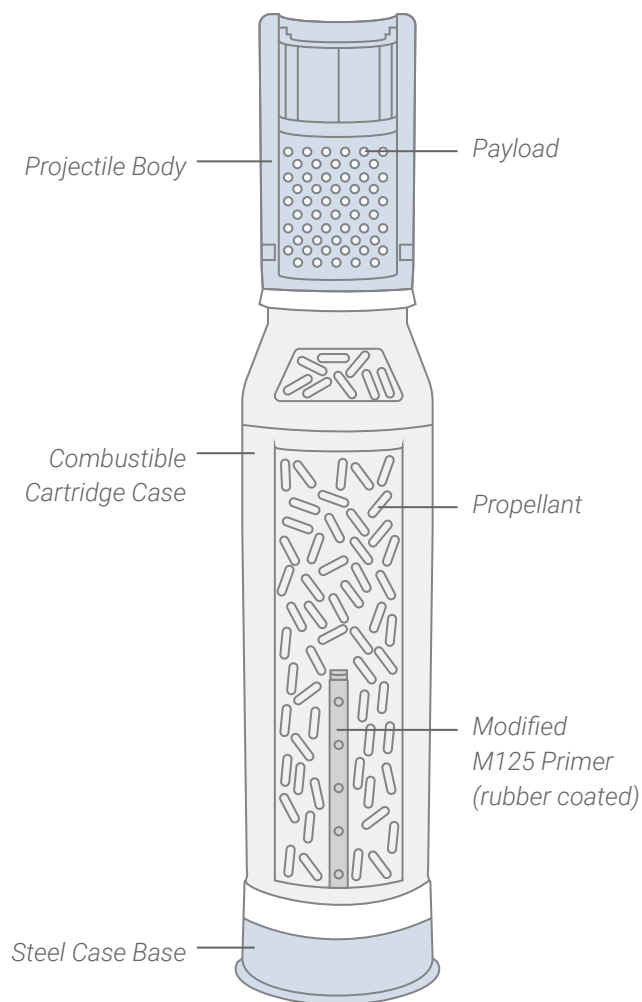

CARTRIDGE DATA

Length	780mm (30.7")
Weight	22.9kg (50.5lbs)
Propellant Type	Double Base
Chamber Pressure	5600 bars (81.2k psi)

PROJECTILE DATA

Type	Tactical
Length	317.5mm (12.5")
Weight	11kg (24.3lbs)
Muzzle Velocity	1410m/s (4626ft/sec)
Range	500m
